Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Finamore (US 4,517,999).

Regarding claim 4, Finamore discloses a wig comprising a base (116) from of a thin sheet, hair segments (148) are implanted onto the base, and an adhesive layer (162) is formed on an underside of the base (see Figure 13; column 8, lines 40-50). The adhesive layer (162) is formed on an entire underside of the base (116) with a uniform thickness having projected portions and remaining portions (see Figures 12 and 13). The projected portions engaging root portions (148) of the implanted hair segments protrude from a underside of the base and the projected portions are raised toward a surface side of the base (see Figures 12 and 13). Finamore does not disclose the adhesive layer being in a range of up to about 20 times greater than the thickness of the

base (claim 4), and the projected portions of the adhesive layer having a height of 80 microns (claim 5).

Regarding claim 4, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have the adhesive layer be in a range of up to about 20 times greater than the thickness of the base, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233. Regarding claim 5, it further would have been obvious to one having ordinary skill in the art at the time the invention was made to having the projected portions of the adhesive layer have a height of 80 microns, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. In re Boesch, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).
